

WordPress & WooCommerce Engineer with 7+ Years Experience

About Me

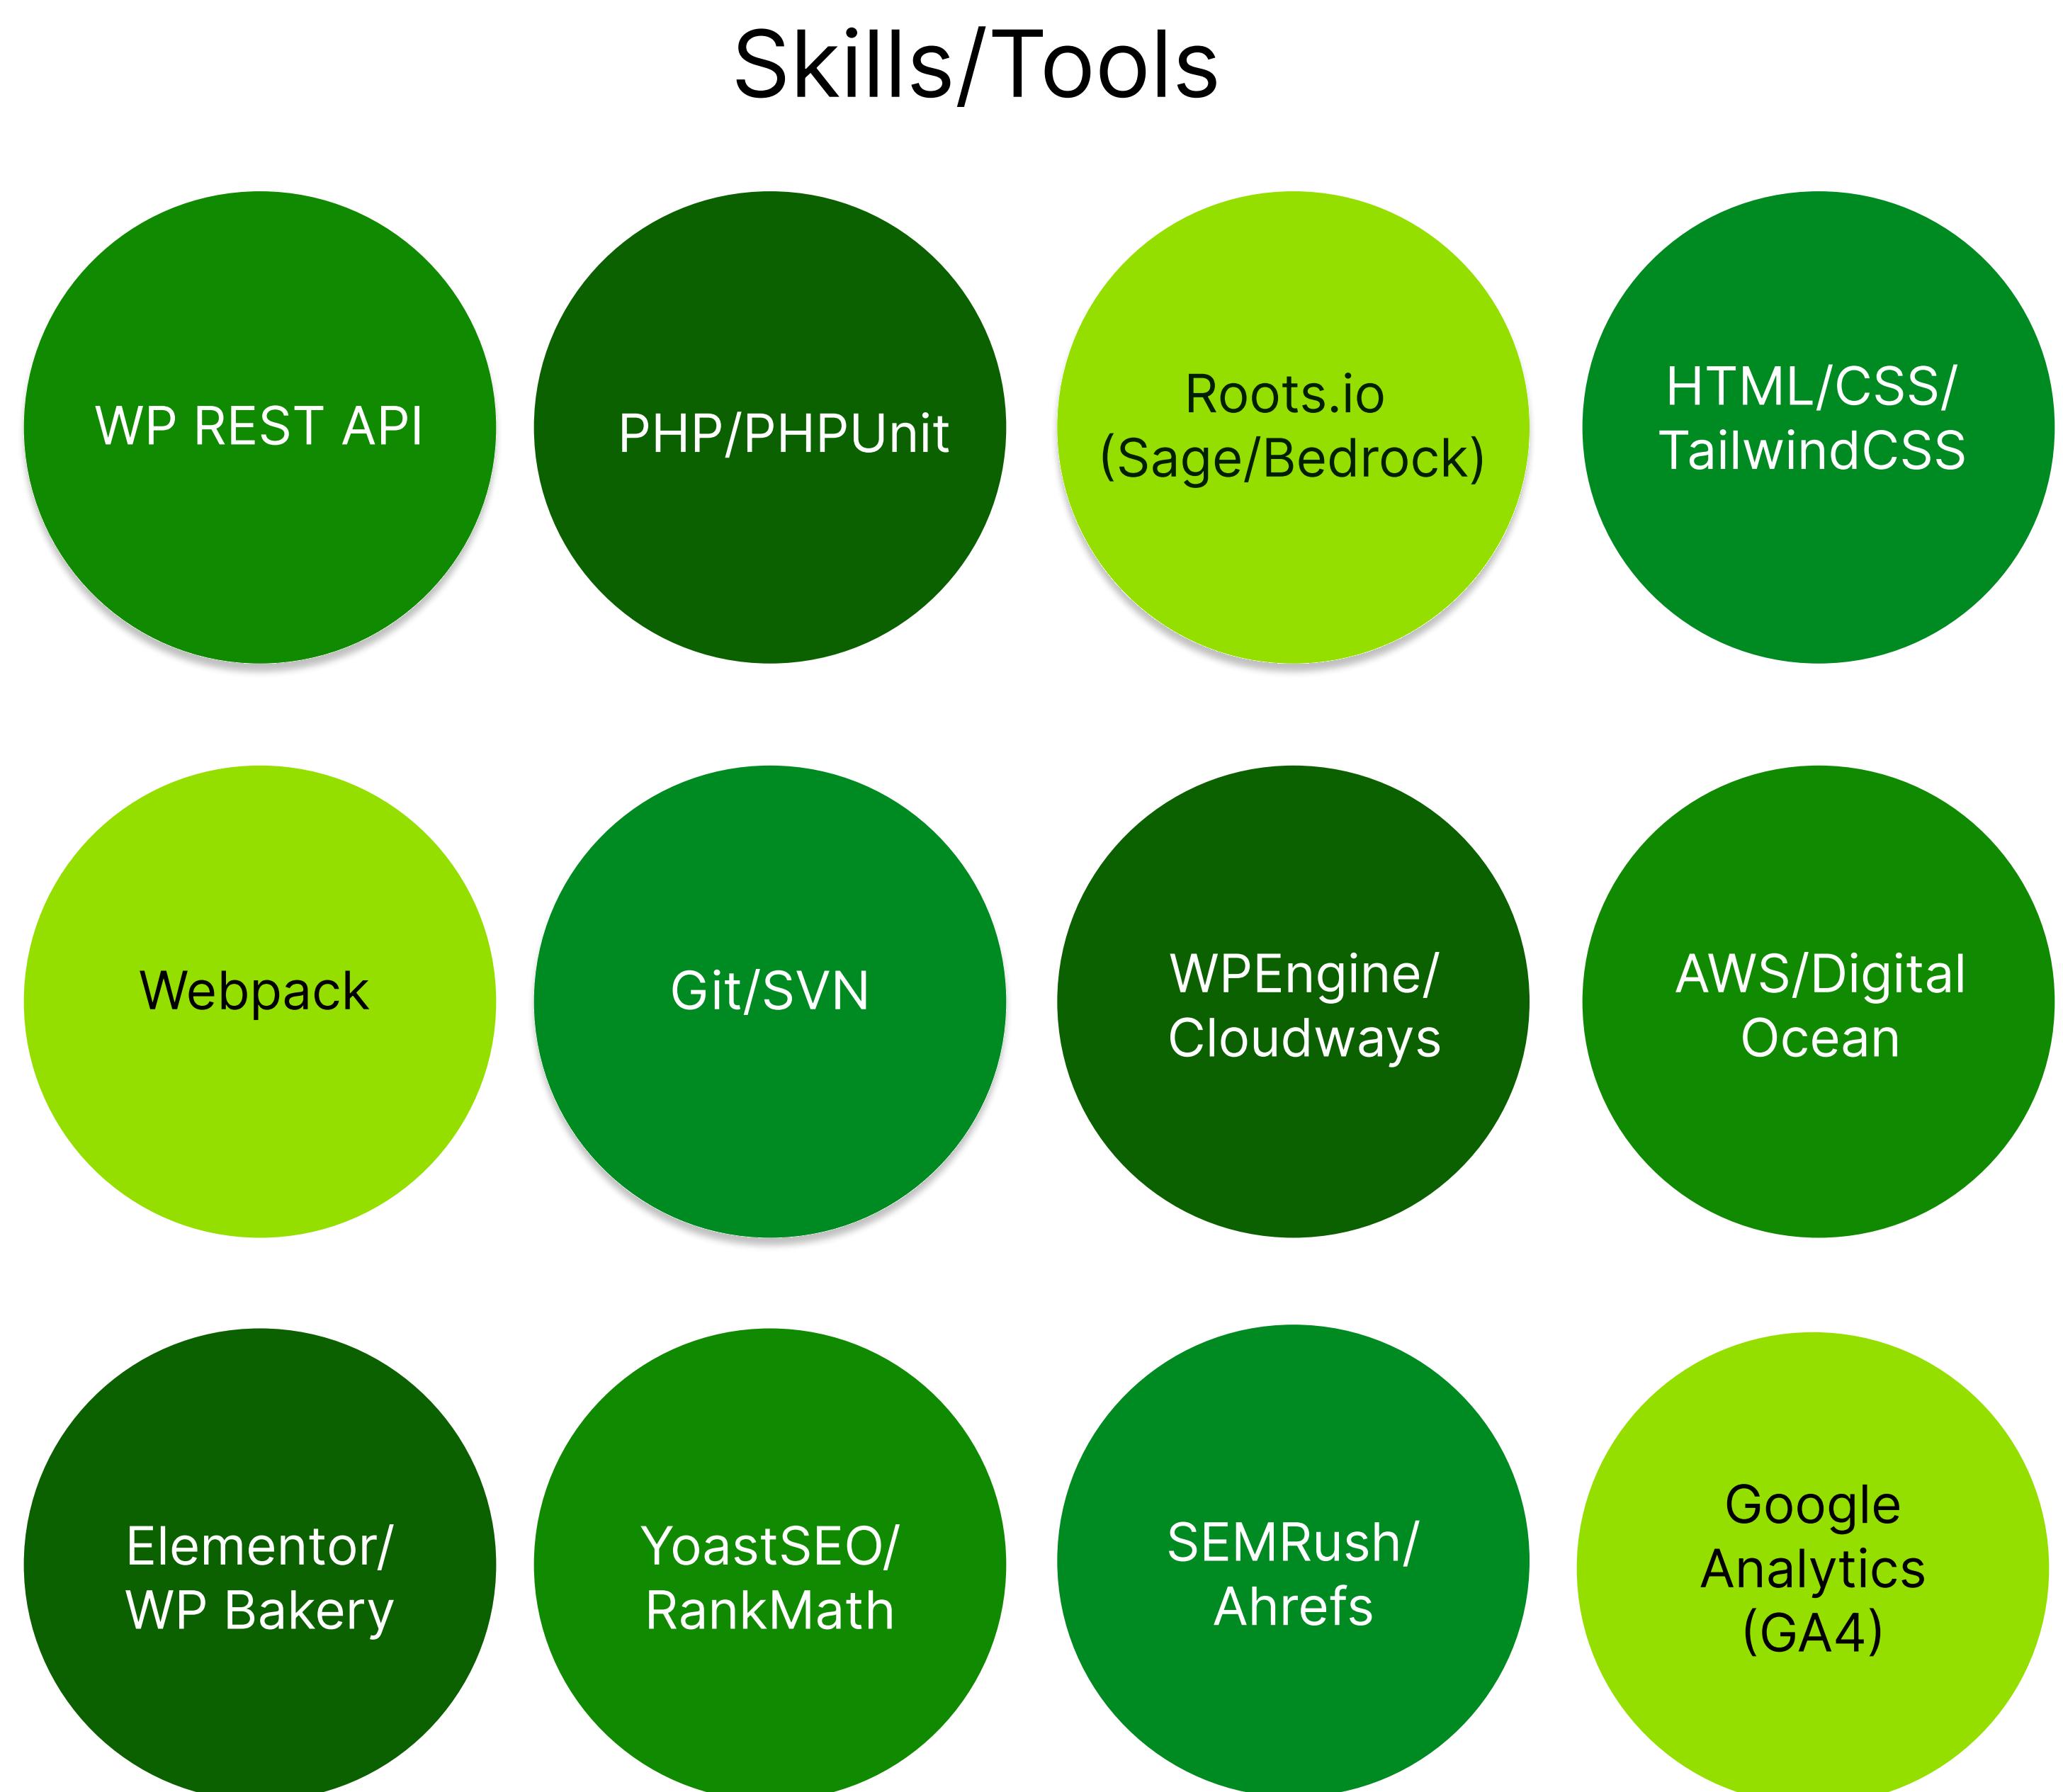

I am a WordPress wizard who knows how the customer thinks, and I have been helping businesses reach their online goals for over a decade.

My philosophy is to help projects succeed by writing clean code, while at the same time constantly iterating and improving. I believe proper web maintenance is much like getting your oil changed.

I also have a heavy background in SEO, and I develop websites that absolutely excel in the search engines. I do this by ensuring core web vitals, automating the use of search engine friendly markup, and building out/implementing third party tools that help web properties manage the SEO themselves.

All front end code is responsive, and all backend code is fully unit tested.

Freelance / UpWork July 2021 - Present

The Wellness Way thewellnessway.com

WordPress/MemberPress Subscriptions

The Wellness Way (thewellnessway.com) is a heavily customized website based off of the Salient theme. I have built a suite of custom plugins for the site including plugins that manage various shortcodes and functionality such as login forms, account dashboards, glossaries, memberships, and a protein calculator. I help manage store.thewellnessway.com, which is built on Magento.

- Implemented subscription based “TWW+” program using MemberPress. The site has over 15,000 free and paid subscribers.
- Integrated payment gateway using both Authorize.net (for the store) and Stripe (for memberpress subscriptions)
- Built a custom glossary and research database organized A-Z
- Built a custom protein calculator plugin which the company uses to consult with patients
- Created custom account dashboard where users can management account information such as passwords, username, and membership status
- Leveraged MemberPress API to customize registration forms, email signups, and subscription management
- Created splash pages and templates for reports for ticket sales on WooCommerce site leadershipandlongevity.com - a seminar run by The Wellness Way
- Create custom Templates integrated with WP Bakery
- Create pages with custom HTML 5 videos/shows

Unchained unchainedcrypto.com

SEO/Consulting & Website Maintenance

I helped the Unchained Podcast rank on the first page of Google for “Crypto Podcast” by optimizing the performance of the website. I created content for category pages, optimized titles and meta, and I developed and implemented a Crypto Glossary.

I then helped the owner obtain the domain name unchainedcrypto.com (formerly unchainedpodcast.com) to help her in her plans of launching a new website.

Bluefield Identity

Custom WP Plugin github.com/Bluefield-Identity/wp-bluefield

Created a custom plugin that helps business owners save on Google Ad spend by filtering out bots. I built the UI/and backed functionality such as the settings and rest API. The plugin is fully unit tested using PHPUnit & WP Mock.

Administrators are able to use the plugin to target specific client variables, such as Google UTM parameters and server data in order to track visitors to the website and prevent click fraud.

The Pretty Obsessed theprettyobssed.com

WooCommerce, ShipStation, & Kaviyo

Not my typical project, but an essential one. I helped the owner implement an email marketing flow that was fully integrated with WooCommerce, ShipStation, and Klavio.

This involved syncing the three applications in order to get them working in unison. I also provided supplemental support designing the website as well as building the HTML email templates using a TailwindCSS Email framework.

Forms for Sparkloop namesbee.com

Official WP Plugin wordpress.org/plugins/forms-for-sparkloop/

I built a custom plugin for namesbee.com which generates a newsletter sign up form that recommends additional newsletters that are part of the Sparkloop publisher program.

The plugin simplifies the sign up process as users can simply enter the shortcode [sparkloop_form] on any WordPress page to create a sleek and modern form that generates revenue by recommending newsletters.

AngelsGardenGifts angelsgardengifts.com

WooCommerce/Elementor

I helped anglesgardengifts.com - a small local business that sells garden gifts and art - migrate to a new WooCommerce site by building out the menu and page templates using Elementor.

I also acted as an SEO consultant, and helped the business owner set up all of his GA4 tools as well as web entities.

FlyingMag flyingmag.com/flight-schools

Custom WordPress Directory

I developed a schools directory for FlyingMag, which enabled the company to secure an annual six figure promotional deal with ATP flight schools. The contract was secured 2 weeks after launch.

I collaborated with the FlyingMag authors, editors, and pilots, to create a system that ranked flight schools a set of filterable criteria. Fully integrated with WordPress, admins can upload schools to the backend which will populate in the directory.

Freelance / UpWork (Continued) July 2021 - Present

Concretelron concreteiron.com

WooCommerce Multivendor Website Development

Concreteiron.com is a multivendor WooCommerce site that allows anyone to list concrete equipment for sale. I developed the site in its entirety, including both the front and backend, by heavily customizing the Lisfinity theme. I used ReactJS to customize the Dashboard, and PHP to extend the theme and build a custom plugin to achieve a level of customization required for a large ecommerce site.

- Heavily customized the multivendor theme Lisfinity
- Developed a plugin that extended Lisfinity & WooCommerce, that allowed users to list equipment for sale as well as purchase various package products
- Customized a fields builder that manages categories and fields, as well as built a suite of simple APIs to update them
- Built a customized dashboard for vendors to view analytics a manage listings, including editing, deleting, marking as sold, renewing packages, and more
- Developed various custom WP status's that allowed vendors to mark their listings as sold, expired, and incomplete. Expired listings surfaced in the SERPs.
- Completed a data import with 1,500 listings dating back to 7 years
- Built a module that generates dynamic SEO title and meta tags for filtered pages
- Integrated a customized React-based Gravity Forms to allow customers to send messages to specific vendors
- Built all front end pages
- I was added as a core contributor to the Lisfinity theme as a result of launching the website

Additional Experience

Audio Assemble audioassemble.com

Nov 2017 - October 2021

Founder/Owner

Founder and owner of web property Audio Assemble - a website geared towards helping musicians gain an edge in their career.

- Develop site as well as new features, modules, and components of the site. One example is the music school directory where we rank the best music schools in the US using a point based ranking methodology
- Build relationships with industry leaders in music equipment and music production software
- Develop strategies for lead generation for a number of partners through content marketing and other online initiatives
- Developed content strategy and manage a team of creatives and audio engineers that create guides, tutorials, and top lists
- Perform all SEO/SEM duties.
- Contribute articles as an author and optimize. Have personally written many articles that rank in #1 on Google for high volume and competitive keywords
- Our site has been featured on many well known and industry leading blogs, news sites, and university press articles

Amazon AWS aws.amazon.com/blogs

Jun 2019 - October 2020

WordPress Engineer

Led engineering efforts for maintaining AWS Blogs multisite WP Instance.

- Maintain PHP for the entire organization, including updating both PHP and PHPUnit
- Develop and maintain WordPress plugins that empower AWS writers
- Represented AWS blogs during AWS Cookie Consent initiative in accordance with EU Cookie Laws
- Achieved operational excellence by implementing best security practices including ongoing audits, and dedicated security plugins, such as the secure email plugin
- Developed library to detect Amazon Apollo environments
